Re: Reclamation of the Betty and Straight Creek Mines
(ACT/017/018)

Dear Mr. Braxton:

Energy Fuels Nuclear Inc. (EFN) is currently preparing for reclamation of the Betty and Straight Creek Mines, which are located in southeastern Utah. This letter serves as notification of this intent. Reclamation activities are expected to commence in early October, 1987, and reclamation completed of both mines by November 1, 1987.

Reclamation of the Betty Mine will proceed as per the Reclamation Plan contained within the U. S. Forest Service Operations Plan as amended by past correspondence. Basically, reclamation at both mines will consist of recontouring waste rock dumps to at least a 3H:1V slope, re-establishment of drainage-ways, removal or burial of all structures and trash, spreading of any available topsoil, burial of portal areas, sealing of vent holes, and reseeding of mine and access road areas. In addition, all provisions of the Mine and Reclamation Plan(MR 2) will be observed in the case of the Straight Creek Mine. No reclamation plan has been filed with the State for the Betty Mine.

If you have any questions concerning this matter, or wish to have a State representative visit the site during reclamation activities, please call me at our Denver office.

Sincerely,

William J. Almas
